

TEMPERED GLASS FULL COVER CURVED SCREEN PROTECTORS

This is an **Edge Glue** tempered glass, with glue on its entire surface, which means it is very stable and harder to detach.

New TEMPERED **GLASS FULL COVER CURVED SCREEN PROTECTORS 0,30mm** by **VOLTE-TEL** is one of the thinnest in the market with only **0.26mm/ 0,30mm thickness**, so it doesn't add any extra volume to your smartphone and doesn't change the texture of the screen. However, it protects the screen from hard scratches and hits. New **TEMPERED GLASS FULL COVER CURVED SCREEN PROTECTOR** covers perfectly the entire screen and is available in **three colors black, white and gold**, has **great limpidity** and also it doesn't change the contrast, brightness and colors of the screen.

This product has **high degree of hardness of 9H**, so it is very difficult to break or scratch, especially in compare with simple screen protectors. It is constructed **with high definition rounded edges 2.5D** for greater safety and avoidance of injuries and even if it breaks by a very strong hit, it becomes very small pieces, without scattering, such as the car's windshield, so there is no risk of user injuries or screen's scratches. Finally, due to the construction material, **you get rid of unsightly bubbles** which can be very easily created, by using the simple screen protectors, as it fits perfectly on the screen of your smartphone.

Package includes:

- 1 Tempered Glass Full cover **curved** Screen Protector **0,26mm / 0,30mm**
