

New Brand!

New Cases IDOL 1991 by VOLTE-TEL.

ULTRA THIN 0.3mm TPU CASE

VOLTE-TEL and **IDOL 1991** collaborate to present the new **Ultra Thin Cases** for your smartphone. With **only 0.3mm thickness**, these protective covers are the most ideal choice for those, who refuse to use cases, but wish to protect their phone from everyday wear and tear such as scratches, at the same time. They are also ideal for those who use belt cases or pouches since these cases can be used in conjunction with them.

Pleasant to touch, extremely ductile and durable and ultra thin and **100% clear** at the same time, to the point you will forget you ever placed them. In this manner your smartphone will be adequately protected using these almost non-existent cases. Furthermore, due to the unique design of their inner side, your smartphone will not have any ugly "water stains" on its back, that you can usually notice when using a common TPU case. Easy to wear and remove, these cases can be washed and repositioned. You can also use all the functions of your device, thanks to the special cutouts.
