

NSP USB CHARGER-DATA MAGNETIC BRAIDED CABLE NSC01 3.5A QC 2.0 1m

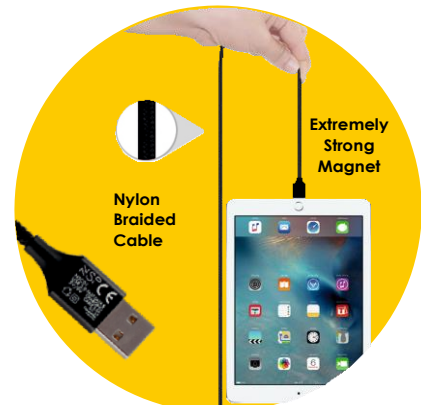

a necessary accessory for your mobile that will solve your every problem! They are ideal for charging all your devices with micro **USB**, **Type C** και **Lightning** connectors. They support quick charging (**Quick Charge 2**) and data transfer in **3,5A** and they are also ideal for avoiding any kind of damage in your device's charging port, as well as you may put your connector mounted on your device all the time, and only adjusting the cable if needed. This way the charging port is not at risk of damage and in addition the charging connector protects the charging port from annoying fluff so as to avoid the risk of ignition during charging. As long as you have the connector permanently attached to the device, it is very easy to adjust the cable, even when driving. The powerful magnet allows you to connect and start charging automatically as soon as the cable is connected to the contact and the LED will tell you about the power supply, as it turns blue when the device is charging and green when charging is complete.

USB cables from **NSP** and **VOLTE-TEL** with an innovative magnetic removable charge design designed to remain permanently attached to your device.

- Ideal for charging all your devices with Micro USB, Type C and Lightning connectors
- Support Quick Charge (Quick Charge 2) 3,5A
- Data Transfer

This powerful magnet also assures you that the cable will not detach while charging or transferring your data, as it can lift the weight of an iPad 9.7 without getting detached. Finally, the cable is made of nylon braided yarn and aluminum shell, features that make it extremely resistant to everyday wear and tear. It does not get mixed, does not crumple and break like other common cables and remains brand new after many uses. By using the appropriate charging contact is fully compatible for use with Apple iOS 12.2 and iTunes 12.9.4 devices. Available in 3 colours **Black**, **Silver** & **Red**, to choose the one that suits you.
