

## NSP USB CHARGERS-DATA MAGNETIC BRAIDED CABLE NSC02 4.0A QC 3.0 1.2m

The necessary accessory that will change the way you charge your device!  
Compatible with all devices bearing **micro USB**, **Type C** and **Lightning** ports.

Support fast charging (**Quick Charge 3.0**) on **4.0A** and even faster data-transfer, plus they are ideal on damage prevention to your device's charging port, since you may hold the connector **constantly mounted** on the device and adjust the cable only when needed.

This way the charging port will be constantly and completely **protected** because of not suffering from **daily wear** as well as from **the annoying fluff** that usually accumulates in the recess.

Since you hold a permanent magnetic connector attached to the device, it is **very easy** to adjust the charging cable, **even when driving**. The connection of both the connector and the cable are adjusted appropriately so as to rotate and to **charge comfortably at 360°**. The magnet creates a direct connection and **automatic charging start** the very moment the cable is connected to the connector contact. The **LED** indicator notifies you about the power supply as it turns **blue**.

**Output:**  
5V – 4.0A  
9V – 2.5A  
12V – 1.8A

**Nylon Braided Cable**

Also, the powerful magnet ensures you that the cable will not get detached during charging or transferring of your data, since it can lift the weight of an **iPad 12,9 (641g)** without being detached.

Finally, the cable is made of **Nylon Braided** yarn and **aluminum shell**, features that make it **extremely resistant** to daily wear and the **length of 1.2m** does not limit you anywhere.

It does not tangle, does not wrinkle and does not break like other common cables and remains as new after many uses. Using the appropriate charging contact is fully compatible for use with Apple devices. Is available in 2 colours **Black** and **Red**, to choose the one that suits you the most.
