

NSP N12 CABLE ADAPTER DISPLAYPORT V1.2 TO HDMI 4K/60HZ V2.0

If your personal computer, your laptop or your graphics card is equipped with a mini display port and you want to connect it with a screen that is using an **HDMI port** then the new **N12** adaptor from **NSP** will make your life easier and more fun!

This adaptor **supports 4K Ultra HD at 60Hz** and is fully compatible with older display versions like **Full HD 1040p**. It also **identifies the maximum display capabilities** of your screen and **adjusts automatically to the best resolution**. The N12 adaptor gives you the means to project your **photos, videos, movies, series even your favorite game to a monitor, TV or a video projector**. The connection is easy and fast since **there is no need for extra power input, special software or drivers**. The adaptor offers **active display** so it is compatible with graphics cards that use **ATI Eyefinity 1/2/3/4/5/6 technology** as it supports **Eyefinity Wide Area Technology**.
